HEADLINER

R-9560

Red Dot Ohio (formerly JBAR A/C) has designed a new headliner unit for 2015 that delivers equal or better air movement than the competition.

With four blowers, the R-9560 is ideal for shuttle vans, small buses, and other applications where you need high CFM without consuming a lot of interior space. The unit draws air from the bottom, has a remote control panel option, and uses our new electronic thermostat (71R3350). An added benefit: a hinged bottom makes it easy to change filters and access components.

The R-9560 will be available in first quarter 2015.
